

A seamlessly integrated solution for all of your mobile needs...

SMART | AMIIX®

Mobile Work Management Module

- ▶ Runs on 100% Microsoft Technology
- ▶ Hardware Independent
- ▶ NO Middleware Required
- ▶ Supports Completely Disconnected Operation
- ▶ Online Status/Review/Approval
- ▶ UID 2D Barcode Compliant
- ▶ Compatible with Oracle and SQL Server
- ▶ Automatic Mobile Software Updates

The **SMART | AMIIX** Mobile Scanning Software is a key addition to AssetSmart's Asset Management 360 Initiative to provide customers with a completely integrated one-stop solution for their life cycle asset/material management and mobility needs. **SMART | AMIIX** supports both Oracle and SQL Server platforms as well as mobile hardware running Windows Mobile 5.0 or higher.

For AssetSmart software users, **SMART | AMIIX** offers a seamless process of automatic generation of download data sets without intermediate PC files, spreadsheets or IT intervention. The server-based management module allows real-time status tracking of unlimited mobile work sets which may be selected by organization, last inventory date, location, contract, etc. When completed, collected data is uploaded seamlessly back to the server where a full review and approval process may be initiated before the system updates the base tables. **SMART | AMIIX** supports individually controlled tagged assets as well as storeroom-warehouse controlled material and spare parts inventories.
