SMART | ENCATS

- ▶ Standardize Equipment Descriptions
- ▶ Modernize Your Asset Database
- ▶ Optimize Mission Critical Support
- ▶ Utilize Your Technology Investment
- ▶ Enhance Metrology Metrics
- ▶ Search By Performance Specifications

**SMART | ENCATS** provides a process that standardizes and structures asset descriptive attributes into consistent formats and values, and automatically combines attribute data into useful management information so as to enhance asset management processes. **SMART | ENCATS** provides enterprise-wide visibility over your physical asset portfolio in well-organized, standardized formats plus comparison by performance characteristics. With **SMART | ENCATS** Enterprise Catalog System, your equipment specialists and engineers have complete equipment data including performance specifications at their fingertips.

With performance specifications, you can search your inventory for the best fit for new projects using existing available resources—not buy or rent more equipment unnecessarily.
