

SMART | UID

Unique Identification Registry Module

- ▶ Capture and Upload Item and Event Data to the IUID Registry
- ▶ Enables Interactive Review, Update and Tracking
- ▶ Supports All Constructs, Population Types, and Event Categories
- ▶ Minimizes Errors Via Extensive Defaulting and Validation Capabilities
- ▶ Maintains a Complete Permanent History and Audit Trail
- ▶ Essential for Contractors with IUID Submission Requirement

SMART | UID connects asset systems to the Department of Defense (DoD) Item Unique Identification Registry, offering a long-term integrated IUID solution meeting the full specification, not just a one-time upload tool.

SMART | UID seamlessly integrates with the SMART | PEMS Property and Equipment Management System for controlled assets, and the SMART | TMS Tools, Material and Spares module for material. It also supports manual inputs or imports from external applications or spreadsheets. The software ultimately saves time and ensures consistency and accuracy through extensive validation rules and configurable auto-fill values. **SMART | UID** supports both Oracle and SQL Server platforms.
